Professional Summary

Entry-Level Data Engineer with hands-on experience in SQL, Python, ETL workflows, data validation, and backend systems. Strong foundation in data modeling, data quality, observability concepts, and analyzing structured and semi-structured datasets in production environments. Background in QA engineering and AI systems evaluation provides deep understanding of how data flows, breaks, and behaves across the full software lifecycle. Seeking a full-time Data Engineering role to build scalable, reliable, and high-quality data pipelines.

Technical Skills

Data Engineering: ETL Pipelines, Data Modeling, Data Cleaning, Data Transformation, Data Quality Validation, Observability Concepts, SQL, Python, PySpark, Microsoft Power BI, Redash

Databases: PostgreSQL, MySQL, MongoDB, Relational Schema Design, Query Optimization, Prisma ORM

Backend Systems: REST APIs, Data Validation, Server-side Processing, Node.js, Express.js, NestJS, JWT Authentication

AI Quality Engineering: LLM Benchmarking, Model Evaluation, Edge Case Analysis, Behavioral Testing, API Testing, System Reliability

Tools DevOps: Git, GitHub, Docker, Jira, CI/CD Concepts

Professional Experience

Data Engineer

Feb 2026 – Present

Krutsha AI | Apprenticeship

- Analyze structured and semi-structured datasets to identify trends, anomalies, and inconsistencies.
- Validate ETL pipelines to ensure accuracy, completeness, and data integrity.
- Investigate data quality issues and failure points across production systems.
- Apply data modeling principles to improve reporting workflows and BI architecture.
- Support product and engineering teams with data-driven insights.

AI Systems Evaluation in Magic AI Project

Nov 2025 – Present

Acadify Solution | Full-time

- Designed and executed structured evaluation workflows for LLM-based production systems.
- Conducted behavioral testing to detect hallucinations, inconsistencies, and edge cases.
- Validated API responses for accuracy, reliability, and usability.
- Collaborated with backend engineers to improve system stability and response quality.

Backend / AI Systems Quality Engineer

Aug 2024 – Nov 2025

Acadify Solution | Apprenticeship

- Built and tested backend systems using Node.js and REST APIs.
- Identified failure patterns and improved production reliability.
- Contributed to structured data validation and workflow integrity.
- Strengthened understanding of system architecture and full data lifecycle.

QA Engineer

AppTestify, Pune | Full-time

Aug 2021 – Aug 2023

- Executed functional and regression testing for web and mobile applications.
- Designed and executed test cases ensuring data accuracy and system consistency.
- Collaborated with backend developers to debug data flow and infrastructure issues.
- Developed strong understanding of SDLC, APIs, and production-level systems.

Selected Projects

ImpactBridge Backend (2025)

Developed backend architecture for a CSR compliance platform using NestJS, Prisma ORM, and PostgreSQL. Designed relational schemas and audit logging workflows to ensure data integrity.

Enterprise Bug Tracker (2025)

Built REST APIs with JWT-based multi-role authentication using Node.js and MongoDB. Designed workflows to manage bugs, test cases, and issue tracking dashboards.

Donation Platform (2024–2025)

Developed MERN-based donation system with secure payment integration and role-based permissions. Implemented structured validation for transaction reliability.

Telegram AI Bot (2025)

Built AI-powered Telegram bot using Python and Flask with API integration, session management, and structured error handling.

Education

B.Tech, Computer Software Engineering

Parul University

2023 – 2026

Diploma, Computer Science

Kalinga University, Raipur

2019 – 2022

Research Paper

Presented research paper titled “**Enhancing Trust in Digital Philanthropy: Design and Validation of an Integrated Multi-Role Donation Platform**” at the **2nd International Conference on Computing, Sciences and Communications (ICCSC-2026)**, organized by ABES Engineering College, Ghaziabad, India, February 12–13, 2026.

Certifications

AI Trainer Certification – micro1 (2026)

Introduction to Internet of Things – NPTEL (2025)

Generative AI Mastermind – Outskill (2025)

Effective Leadership – HP LIFE (2025)

Theory of Computation – NPTEL (IIT Kanpur) (2024)

Additional Information

Languages: Hindi, Bhojpuri (Native), Bengali(Beginner), English (Professional)

Availability: Open to full-time Data Engineering and Data Analyst roles.

"I know many domains, not because I'm confused, but because I'm excited to learn and build better systems."
